Integration & Software Developer

Professional Summary

Experienced Software Developer with over 5 years of hands-on expertise in designing and developing enterprise integration systems using C#, .NET, REST APIs, and messaging technologies including Kafka. Adept in system integration, API design, event-driven architecture, and cloud deployments (Azure DevOps).

Passionate about building scalable, secure, and reliable solutions that enhance systems.

Professional Experience

Intermediate developer

Bidvest SACD | Cape Town, Paarden Eiland

October 2025 – Present

- Modernizing legacy **VB.NET applications** by migrating them to **.NET 8+** frameworks.
- Migration of the conversion of a **Xamarin Android mobile app** to **.NET MAUI**, as Xamarin is being deprecated by Microsoft.
- Improve integration reliability, scalability, and maintainability on Azure portal
- Participating in planning for future cloud and API-based integration initiatives to streamline operational workflows.

Integration Developer

TFG (The Foschini Group) | Cape Town, Parrow

Mar 2021 – September 2025

- Exposure on the BizTalk Server 2013/2016 environment: Creating Send ports, port filtering properties, maps, schemas and pipelines.
- Exposure to Azure DevOps and CI/CD concepts: Build and release pipelines, managing sprints, backlogs, and repos.
- Connecting Azure Repos to OpenShift for container deployments.
- Kafka development including producers, consumers, offsets and partitions.
- Worked with Apache & Confluent Kafka and Red Hat OpenShift.
- Developed APIs and web services using Web API and REST.
- Skilled in .NET Framework, .NET Core, C#, Web API, Entity Framework, Java and JDBC.
- Familiar with ASP.NET MVC, Angular, JavaScript, HTML, XML and XAML.
- Experienced in Agile Development methodologies and Test Driven Development.
- Used the Intent Architecture tool along with Visual Studio.

Graduate: Digital Business Solutions

Datacentrix | Cape Town, Century City

Feb 2020 – Jan 2021 (1 yr)

- Migration of applications and data to web servers.
- Re-tested, bug fixed and re-structured existing applications for clients.
- Created automation applications for clients such as manipulating data and information.
- Worked with API frameworks like Postman for GET and POST requests.
- SharePoint activities including web application development and updating site collections.

Core Skills

- C#, .NET Framework & .NET Core
- RESTful & SOAP Web Services
- Messaging Protocols (Kafka, HTTP/S, FTP/SFTP)
- System Integration & API Gateway Development
- Azure DevOps (CI/CD Pipelines)
- SQL & Oracle Databases
- JSON, XML, XSLT
- Unit Testing & Debugging
- Agile, Scrum, Git
- Exposure to HL7, FHIR, SOA principles
- Kafka based event driven architecture
- Docker, Kubernetes, OpenShift

Education

2015 – 2019

BSc in Computer Science
